

 WASHING	 BLEACHING	 DRYING	 IRONING	 PROF. CLEANING
 Normal process	 Any bleach allowed	 Tumble drying process, max. 80 °C.	 Max. 200 °C	 Professional dry-cleaning in tetra-chlorethene 
 Gentle process		 Tumble drying possible, max. 60 °C.	 Max. 150 °C	
 Normal process	 Only oxygen / bleach allowed	 No not tumble dry	 Max. 110 °C	 Professional dry-cleaning in hydro-carbons 
 Gentle process	 Do not bleach		 Do not iron	
 Normal process	<ul style="list-style-type: none"> Follow instructions. Sort textiles according to colours – wash light and dark colours separately. The ciphers in the washing tub specify the maximum temperature in °C which must not be exceeded. A bar underneath a symbol instructs to choose a milder care treatment by reducing the mechanical action. E.g. to use more water/higher water levels, to wash less at a time and to reduce spinning. The letter inside a circle (professional dry or wet cleaning symbols) informs laundries of which solvent or cleaning method to use. The uneven resistance of colour to washing will be avoided by washing dark coloured textiles inside out. It will also prevent the pilling of textiles There is also symbols for natural drying, for example  and . More information can be found in the rules TSL 23-901, point 8. <p>(Textile care instructions are based on Standard SFS-EN ISO 3758 and manula TSL 23-901.)</p>			 Do not dry-clean
